

## Dr. Bruce Marko on the SUNETICS Clinical Laser Unit

Dr. Bruce Marko, founder and Medical Director of Enhanced Images of Charlotte, NC offers his patients a wide range of minimally invasive cosmetic procedures and services, including the latest in hair, body and skin rejuvenation treatments.

Dr. Marko utilizes the Sunetics Clinical Laser in his Practice to stop hair loss and regrow hair in many of his patients. "In the fifteen months I have been using the Sunetics Laser in my practice, my patients have had very noticeable results and our patient satisfaction is over 95%. I have been using the Sunetics Laser for my own personal use as well and I, personally, am also one of those extremely happy patients!", says Dr. Marko.

"I incorporated the Sunetics laser hair restoration system into my practice over one year ago. I spoke with colleagues and reviewed their photos prior to adding the Sunetics Laser to my practice. Even after seeing their results, I was still skeptical when I first added it to my services. I have to report that the Sunetics Laser has been a wonderful addition to my practice. I have had excellent results both as a stand-alone treatment for the appropriate candidate, such as those in the early stages of hair loss or women with diffused hair loss, and as well as for those as a post surgical treatment protocol," states Dr. Marko.

**"Below are case studies of 3 males (24, 29 and 34 years of age) that were treated ONLY with the Sunetics Clinical Laser. They followed a protocol of 2 treatments per week for 3 months and then once a week for 3 months. Treatment time was 20 minutes. They all demonstrated excellent results in stopping excessive hair loss and increasing hair regrowth." -Dr. Bruce Marko**
