

### Dr. Bradley Kurgis on the Sunetics Clinical Laser Unit

In a recent interview, Dr. Kurgis says, *"As a dermatologist, I get a lot of questions about hair loss. In the past, the best options I could offer were hair transplant surgery and/or minoxidil and finasteride. We know that many people have a resistance and even fear of surgery and drugs. The Sunetics Laser Therapy was a good option for these patients."*

*I have been providing Sunetics Laser Hair Therapy in several of our free standing locations, separate from my medical office, for about the past year now. We've found people respond to a hair loss treatment that has no potential for side effects and no down time. From the results we have seen first hand, Sunetics Laser Hair Therapy gets wonderful results, and often very quickly."*

#### Such as:

- Excessive hair loss is halted 99% of the time.
- Hair quality improves as weak, miniaturized hair becomes thicker, fuller and stronger in the vast majority of our patients.
- Sunetics Laser Hair Therapy has been shown in our practice to be extremely effective for post menopausal women, post partum hair loss, hypothyroidism, virtually any woman with hormonal hair loss.

**After**

**42 Year Old Male After 2 Months**

**62 Year Old Female After 6 Months**

**50 Year Old Female After 6 Months**

**59 Year Old Female After 6 Months**

### Laser Hair Therapy Treatment stated by Dr. Kurgis:

*"The Sunetics low level laser therapy has shown great potential for treating certain types of male and female hair loss."*

According to Dr. Kurgis, *"Sunetics Clinical Laser utilizes low level laser therapy (LLLT) which reactivates hair growth by stimulating live, but weakened or even diminished follicles at the cellular level. Unlike the high powered laser devices used in various skin treatment applications in his office."* Dr. Kurgis explains, *"Low Level Laser Light Therapy is cool to the touch. No one can tell that they are having a treatment. There is No Pain and No Side Effects and incredibly Safe."*

Dr. Kurgis has a professional office in downtown San Luis Obispo, exclusively for the treatment of hair loss with Sunetics Laser Hair Therapy. This office serves as the headquarters for a network of LLLT treatment centers in Central California.

*"We pride ourselves on using the most advanced products with customized treatment options for our patients. We have seen great results in our practice and in all of our satellite offices with the Sunetics Clinical Laser. This modality is very easy to use. It took no time for our practice to gather patients interested in stopping hair loss and regrowing hair."* states Dr. Kurgis
